

cleaning up milk data

```
#importing our data
milk_data <- import("SDS290_MP2_MilkData.csv")

#deleting the (unwanted rows) to make our project reproducible
milk_data <- milk_data |>
  filter(!row_number() %in% c(1,2))

#Right now, Qualtrics has separated out our DV based on which question they received, but

#milk_data <- milk_data |>
#  unite(willingness_to_listen, Q1_1, Q23_1, Q27_1, sep = "", remove=F) |>
#  unite(maturity, Q11_1, Q24_1, Q28_1, sep = "", remove=F) |>
#  unite(music_type, Q9, Q25, Q29, sep = "", remove=F) |>
#  unite(characteristics, Q22, Q26, Q30, sep = "", remove=F)
```
